MICRO GOALS
Someday
90-day mission
Learn exactly
What to do this week
What to do tomorrow
What to do in the next 60 minutes
Specific target
Specific deadline
Specific scoreboard
I want to get fit
Compress your timeline
Pick your over
Make your result visible
Set a micro-stage
New job?
High-quality applications
Targeted conversations
Daily block
Block it at the same time every day
Writing
Sales
Skill-building
"Overwhelmed"
"In control"
Something fails?
Something flops?
Pivot
Revise
Defences
Need a better goal
"This isn't the right time"
Start after this daily week
Big goals create friction
Friction makes your brain go for easts
Other ground?
Soichiro Honda
- dropped out at 16
- design got rejected
- improved + kept pushing
- factory was bombed
- Kept moving forward until Honda became a global brand
Got moving
POW
Transitions work for reasonable steps
People who fail from dont have easier paths.
Make your future fewer calls

What are Micro Goals?

Micro goals are tiny, achievable steps that break down bigger goals.
Simple enough to start today, powerful enough to keep you moving forward.

PROBLEM

Many DUE students **struggle** to **stay consistent** and **motivated** when learning through online platforms such as the LMS or other e-learning systems.

Research shows that the absence of continuous interaction and real-time reinforcement leads to declining engagement in digital learning environments (Porter & Bozkaya, 2020).

OUR SOLUTION

StreakFlow enhances student commitment by allowing them to:

1. **Set small, achievable daily goals**, such as completing one video lecture or studying for 25 minutes.
2. **Receive instant feedback and streak rewards**, improving their sense of progress and competences.
3. **Share progress with peers in friendly accountability groups**, strengthening their sense of community and motivation.

STUDYARTS

HIGH-PERFORMING STUDENTS

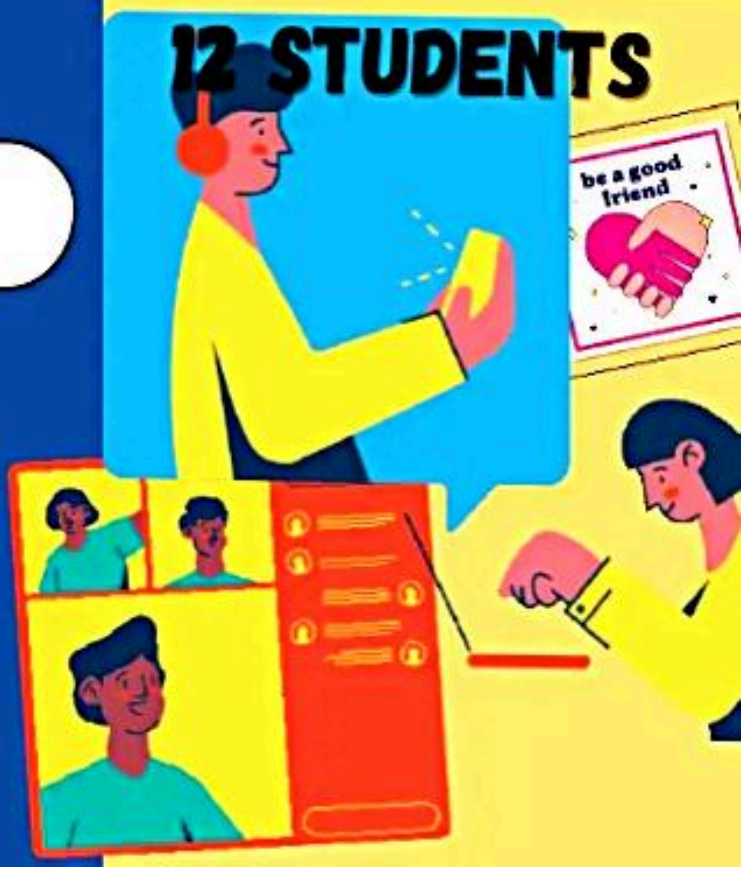
AVERAGE USERS

INCONSISTENT LEARNERS

This mix helped with the uncover patterns of **motivation, frustration, usability barrier.**

Method: semi-structured interviews (30–45 minutes each), screen-share observations.

12 STUDENTS



5 WHYS

5 Whys to find the real reason for low motivation.

STORYTELLING

Storytelling to understand users' feelings and situation.

SHOW-ME EXERCISE

Show-me tasks where users showed how they study and pointed out what annoys them.

INSIGHTS

Motivation drops quickly

Progress is unclear

Lack of social connection

Information overload

ProcrasTrack App User Flow Overview

HMW STATEMENT

STREAKFLOW – MICRO-GOAL MOTIVATION APP

How might we help students stay motivated and consistent in their study habits by turning small daily achievements into rewarding and trackable progress?

STORYBOARD

LINH

LINH IS 20 YEARS OLD
BALANCES PART-TIME WORK WITH STUDIES
AND STARTS HER LEARNING JOURNEY WITH

STREAKFLOW

LINH'S JOURNEY

AWARENESS – HEARS ABOUT STREAKFLOW FROM A FRIEND

INTEREST – VISITS THE SITE, DOWNLOADS THE APP

FIRST USE – SETS A 25-MINUTE GOAL AND COMPLETES IT

REWARD – RECEIVES A STREAK BADGE AND MESSAGE

SHARE – SENDS PROGRESS TO A STUDY BUDDY

LOYALTY – MAINTAINS THE HABIT EACH SEMESTER

TESTING PHASE

- Will students care about tracking small wins?
- Is goal-setting intuitive?
- Does visual feedback motivate?
- Are peer features comfortable to use?
- What keeps long-term engagement?

TESTING RESULTS

- Students liked the simple streak visuals
- Goal-setting must stay fast and easy
- Peer features should be optional
- Motivational messages feel helpful
- Micro-goals seem realistic for students

LIVE PROTOTYPE DESCRIPTION

Core functions:

1. **Goal Setup Screen** – minimal interface for entering small daily tasks
2. **Progress Tracker** – animated streak display with motivational quotes
3. **Peer Circle** – lightweight sharing space for accountability messages

The live prototype uses DUE's color palette and can integrate via LMS single sign-on

Its design emphasizes low effort, high feedback, and positive reinforcement

STEP 1:

1

2

3

STARTING THE HABIT

Linh receives a campus post about StreakFlow, installs it, and sets her first 25-minute goal during a study break

→ Feeling: curious, hopeful
→ direct Reward

Linh receives immediate feedback when completing the first 25 min

STEP 2:

1

2

3

BUILDING CONFIDENCE

After several successful sessions, her progress bar grows. She earns her first badge and feels recognized

→ Feeling: proud, encouraged

This step helps to keep Linh encouraged and wanting to learn more

STEP 3:

1

2

3

SUSTAINING MOTIVATION

She joins a small study group through the app, exchanging short supportive messages.
Over time, the LMS becomes part of her daily rhythm

→ Feeling: connected, consistent, motivated

Each storyboard frame reflects emotional evolution from initial discovery to long-term engagement

NEXT STEP

1. **Integrate StreakFlow with DUE's LMS** through the existing API for seamless login and course tracking.
2. **Conduct usability testing** with 10–12 students for both web and mobile versions.
3. **Refine motivational algorithms** to balance streak intensity and recovery after breaks.
4. **Explore institutional adoption**, allowing lecturers to reward consistent learners.

Future development could also include push-notification personalization and AI-based mood detection for adaptive encouragement.

WHAT MAKES STREAKFLOW DIFFERENT & VALUABLE

DUE students lack motivation consistency. Existing LMS platforms offer little emotional feedback, causing students to lose momentum after the first weeks.

StreakFlow fills this gap by turning small daily wins into visible, motivating progress.

- 25-Minute Motivational Feedback (NEW)
- LMS-Integrated Micro-Goals (Only for DUE
- Soft Social Accountability
- Motivation Algorithm

StreakFlow empowers DUE students to build consistent, meaningful study habits by turning each 25-minute session into visible progress, emotional motivation, and supportive micro-communities ultimately making learning more sustainable and enjoyable.

THANK
YOU!
be a good
